

JEEVA PRIYAN G

Cloud & Infrastructure Engineer | Azure & Microsoft 365 Administrator

Thanjavur, Tamil Nadu • +91 94865 62136 • akilee vapriyan007@gmail.com • [LinkedIn Profile](#)

PROFESSIONAL SUMMARY

Results-driven Cloud & Infrastructure Engineer with 2+ years of enterprise IT experience at LTIMindtree, specializing in Windows Server Administration, Microsoft 365, Azure Infrastructure, and Active Directory. Proven track record of managing 1,000+ enterprise servers, ensuring 100% SLA compliance, and delivering secure, high-availability infrastructure solutions. Skilled in identity & access management (Entra ID / Azure AD), Exchange Online, Citrix VDI, PowerShell automation, patch management, and ITSM-driven operations. Passionate about cloud security, infrastructure optimization, and driving operational excellence in enterprise environments.

CORE TECHNICAL SKILLS

OS & Servers: Windows Server 2008 / 2012 / 2016 / 2019 / 2022

M365 Administration: Exchange Online, SharePoint, Teams, M365 Admin Center

Directory Services: Active Directory (AD DS), Group Policy (GPO), LDAP

Automation: PowerShell, Scripting, Task Automation, Patch Management

Monitoring & Ops: Azure Monitor, Server Health Checks, Vulnerability Remediation

Cloud & Identity: Microsoft Azure, Azure AD / Entra ID, Azure VM, NSG

Virtualization: Citrix VDI, Azure Virtual Desktop (AVD), VMware, Hyper-V

Security & IAM: MFA Administration, PAM, Security Defaults, Conditional Access

ITSM & Tools: ServiceNow, BMC Remedy, Incident / Change / Request Mgmt

Networking: DNS, DHCP, TCP/IP, VPN, Network Troubleshooting

PROFESSIONAL EXPERIENCE

Cloud Engineer | LTIMindtree, Chennai

Sep 2023 – Present

- Administered and maintained 1,000+ Windows Server (2008–2022) instances in a large-scale enterprise environment, ensuring system stability, performance, and security compliance.
- Executed monthly patch management cycles and vulnerability remediation programs, achieving full compliance with organizational security benchmarks and zero critical patch backlog.
- Managed Active Directory (AD DS) infrastructure including user account lifecycle, Organizational Units (OUs), Group Policy Objects (GPO), and role-based access control (RBAC) for enterprise users.
- Administered Microsoft 365 tenant including Exchange Online (mailbox provisioning, distribution lists, shared mailboxes, spam/malware filter policies), SharePoint Online, and Teams governance.
- Performed identity & access management tasks in Microsoft Entra ID (Azure AD), including MFA enrollment, conditional access troubleshooting, and Security Defaults configuration for 1,000+ users.
- Managed Citrix VDI and Azure Virtual Desktop (AVD) environments, handling user session management, profile issues, application delivery, and endpoint connectivity troubleshooting.
- Operated Azure infrastructure including Virtual Machines (VMs), Network Security Groups (NSGs), resource groups, and cloud monitoring to support enterprise workloads.
- Led Privileged Access Management (PAM) workflows, managing elevated access requests, approval processes, and access reviews in compliance with enterprise security policies.
- Administered ShareFolder permissions and storage access controls, enforcing least-privilege principles across network drives and shared resources.

- Managed end-to-end ITSM operations via ServiceNow — handling Incident, Change, and Service Request tickets — maintaining 100% SLA compliance across all priority categories.
- Collaborated with security teams on vulnerability assessments, supporting remediation of critical findings identified through infrastructure scanning tools.
- Developed and maintained PowerShell scripts to automate repetitive administrative tasks including bulk user provisioning, reporting, and compliance checks.

Cybersecurity Intern | Hackup Technologies, Remote

Jan 2022 – Feb 2022

- Assisted in web application vulnerability assessment and security testing using industry-standard tools including Burp Suite and Metasploit; documented findings and recommended remediation measures.

PROJECTS

AI-Powered Intelligent Chatbot | Personal Project

- Designed and developed an AI-powered conversational chatbot leveraging natural language processing (NLP) capabilities to handle dynamic user queries with contextual understanding.
- Implemented backend logic for intent recognition and response generation; deployed the solution with a clean web interface demonstrating practical AI integration skills.

CERTIFICATIONS

- LTIMindtree Certified Cloud Professional – IT Infrastructure & Cybersecurity
- ITIL Foundation Certificate in IT Service Management (Udemy)
- Generative AI Foundation Course
- IT Security Foundations – LinkedIn Learning

EDUCATION

B.Sc. Computer Science with Cognitive Systems

Sri Krishna Arts & Science College, Coimbatore | 2020 – 2023 | CGPA: 8.4
